GENERAL INFORMATION

Established in: 1958
Geographical location: 17°46'50''E, 49°56'12''N
Altitude: 336-354 m
Area: 23 hectares

CLIMATIC CONDITIONS (OPAVA)

Annual mean temperature (1876-1975): 8,2°C
Annual rainfall (1876-1975): 621 mm

*) The picture from title page is young plant of *Umbrella Pine - Sciadopitys verticillata* (Nový Dvůr, Pustka, 1959)

HISTORY OF THE NOVÝ DVŮR ARBORETUM

The Nový Dvůr Arboretum is one of the six exhibition premises of the Silesian Museum. It is a botanical garden with a special focus on dendrology, i.e. the study of trees. The arboretum enjoys a special status within the museum, as no other part of the institution administers living exhibits.

The origin of the arboretum are closely linked to the owner of the Nový Dvůr estate, Quido Riedl (1878-1946). During his time in Nový Dvůr (1906-28) Riedl, with exquisite taste, created a natural, landscaped park in a modestly-sized area of 1.8 hectares, and which contained up to 500 tree species and cultivars from both home and abroad. This park became the foundation for the current arboretum and forms the historical section of the dendrological exhibition, which gradually expanded to its current 23 hectares. In 1928 Quido Riedl returned to his native Bílá Lhota, near the town of Litovel, where, on slightly less than 3 hectares of land, he laid out a similarly impressive park, with a rich collection of trees that later became the foundation for the Bílá Lhota Arboretum. Riedl left the Nový Dvůr estate to his daughter, Elisabeth Schubert and son-in-law Walter Schubert, who tended to the park until the end of the Second World War.

In the post-war period the Nový Dvůr estate went through a number of owners, while the park was deprived of expert supervision and became overgrown and neglected.

The situation changed in 1958, when the park – one of the most valuable dendrological sites in Silesia – was given to the Silesian Museum, which set up the arboretum. The historical part of the dendrological exhibition has been preserved in its natural, landscaped form and, apart from the value of the trees as a collection, the park itself is of immense worth due to its design and composition. The basic structure of the park

Quido Riedl, founder of the Nový Dvůr park exhibition, pictured at his native Bílá Lhota near Litovel (1945)

consists of fully-grown, solitary or grouped pine trees of the Heraltice ecotype, or vegetation surrounding them, which alternate with grassy open spaces. The compositional design of the park allows views of interesting tree combinations showing contrasting structures, textures, habits, autumn colouration or colour and intensity of blossoming.

The newer parts of the dendrological exhibition are based on a different concept. The overall composition is, here, subordinate to the division of the park into geographical units; under the overall title of 'The Trees of Five Continents', each section contains geographically related species. Between 1967-70 a large greenhouse complex was built over an area of 1,300 m², containing an exhibition of subtropical and tropical plants. This complex was open to visitors for 30 years before it had to be demolished in 2000 due to its poor technical condition. It was replaced with a fully-equipped silvicultural greenhouse, part of which was opened to the public in 2010 in the form of a small greenhouse exhibition.

The new manor house was built in the Neo-Renaissance style by Baron Antonín Luft following his acquisition of the Nový Dvůr estate, and used by Quido Riedl between 1906-28. After 1958, it became the administrative building of the newly established arboretum.

The issue of the first Index Seminum Novodvorensis has been dated since 1960.

View of Nový Dvůr manor house from years 1914-1920

GYMNOSPERMAE

CUPRESSACEAE

1. <i>Chamaecyparis lawsoniana</i> (A.Murrayu bis) Parl.	'Glandensa'	3115-91-81
2. <i>Juniperus chinensis</i> L.	'Hilli Blue'	0259-92-80
3. <i>Juniperus scopulorum</i> Sarg.		0636-96-10
4. <i>Juniperus virginiana</i> L.	'Blue Moon'	2047-97-80
5. <i>Microbiota decussata</i> Komarov		0941-91-10
6. <i>Thuja plicata</i> D.Don	'Zebrina'	
7. <i>Thujopsis dolabrata</i> Siebold & Zucc.	'Variegata'	

PINACEAE

8. <i>Cedrus atlantica</i> (Endl.) Manetti ex Carriere		
9. <i>Larix gmelinii</i> (Rupr.) Kuzen.	86183	
10. <i>Larix gmelinii</i> (Rupr.) Kuzen. var. <i>principis-rupprechtii</i> (Mayr) Pilger	190295	
11. <i>Larix laricina</i> (Du Roi) K.Koch	1433	
12. <i>Larix laricina</i> (Du Roi) K.Koch	1593	
13. <i>Larix maritima</i> Sukacz.	85120	
14. <i>Picea abies</i> (L.) H.Karst.	'Acrocona'	1542-94-80
15. <i>Picea jezoensis</i> Carr.		
16. <i>Picea rubens</i> Sarg.	0488-91-10	
17. <i>Pinus contorta</i> Douglas ex Loudon	'Creeping Form'	1886-98-80
18. <i>Tsuga canadensis</i> (L.) Carr.	'Gable'	2782-96-80
19. <i>Tsuga canadensis</i> (L.) Carr.	'Pendula'	

20. <i>Tsuga canadensis</i> (L.) Carriere	'Microphylla'	0766-98-80
21. <i>Tsuga canadensis</i> (L.) Carriere		
22. <i>Tsuga caroliniana</i> Sarg.		
23. <i>Tsuga heterophylla</i> (Raf.) Sarg.		0113-91-70
24. <i>Tsuga mertensiana</i> Sarg.		

TAXACEAE

25. <i>Taxus x media</i> Rehd.	'Sargentii'	616/1183
--------------------------------	-------------	----------

TAXODIACEAE

26. <i>Cryptomeria japonica</i> D.Don		1201-96-10
27. <i>Cryptomeria japonica</i> D.Don		
28. <i>Cunninghamia lanceolata</i> (Lamb.) Hook.		

ANGIOSPERMAE

ACERACEAE

29. <i>Acer buergerianum</i> Miq.		323/78
30. <i>Acer cissifolium</i> (Sieb. et Zucc.) K.Koch		109/80
31. <i>Acer circinatum</i> Pursh		1970-92-10
32. <i>Acer ginnala</i> Maxim.		2242-93-10
33. <i>Acer ginnala</i> Maxim.		1932-92-10
34. <i>Acer japonicum</i> Thunb.	'Aconitifolium'	1018-97-80
35. <i>Acer macrophyllum</i> Pursh.		
36. <i>Acer mandshurica</i> Maxim.		
37. <i>Acer micranthum</i> Siebold & Zucc.	'Candelabrum'	3378-96-80
38. <i>Acer micranthum</i> Siebold & Zucc.		375/80
39. <i>Acer negundo</i> L.		
40. <i>Acer palmatum</i> Thunb.	'Atropurpureum'	
41. <i>Acer palmatum</i> Thunb.	'Sanguineum'	
42. <i>Acer palmatum</i> Thunb. ex Murray		

Original water greenhouse with massive floating **Giant Waterlily - *Victoria amazonica*** leaves under the arched epiphytic trunk (Nový Dvůr, Solnický, 1977)

- | | |
|--|------------|
| 43. <i>Acer palmatum</i> Thunb. Ex Murray 'Azuma-murasaki' | 1852-93-80 |
| 44. <i>Acer palmatum</i> Thunb. var.
<i>palmatum</i> | 2097-92-10 |
| 45. <i>Acer pensylvanicum</i> L. | |
| 46. <i>Acer platanoides</i> L. 'Palmatifidum' | 261/82 |
| 47. <i>Acer rufinerve</i> Siebold & Zucc. | 910 |
| 48. <i>Acer tataricum</i> L. | 2164-94-10 |
| 49. <i>Acer triflorum</i> Kom. | |

ANACARDIACEAE

- | | |

- | | |
|--|------------|
| 53. <i>Acanthopanax setchuenensis</i> Harms | 1339-96-10 |
| 54. <i>Acanthopanax sieboldianus</i> Makino | 87108 |
| 55. <i>Aralia chinensis</i> L. | 0305-91-70 |
| 56. <i>Acanthopanax henryi</i> (Oliv.) Harms | |

BERBERIDACEAE

57.	<i>Berberis amurensis</i> Rupr. f. <i>latifolia</i> (Nakai) W.Lee	1432-93-10
58.	<i>Berberis oblanceifolia</i> C.M.Hu	1781-95-70
59.	<i>Berberis thunbergii</i> DC. 'Red King'	2874-96-80
60.	<i>Berberis thunbergii</i> DC.	
61.	<i>Berberis thunbergii</i> DC. 'Atropurpurea'	
62.	<i>Berberis thunbergii</i> DC. 'Aurea'	88502
63.	<i>Berberis vulgaris</i> L.	0166-92-20

BETULACEAE

64.	<i>Alnus japonica</i> (Thunb.) Steud.	2100-92-10
65.	<i>Alnus kamtschatica</i> (Callier) Komarov	0823-91-10
66.	<i>Alnus maritima</i> (Marshall) Muhl. ex Nutt.	87531
67.	<i>Alnus rugosa</i> (Du Roi) Spreng.	0113-92-10
68.	<i>Alnus sinuata</i> (Regel) Rydb.	0809-91-10
69.	<i>Betula concinna</i> Gunnarsson	1734-92-10
70.	<i>Betula ermanii</i> Cham.	1691-94-10
71.	<i>Betula grandifolia</i> Litv.	
72.	<i>Betula humilis</i> Schrank	81/74
73.	<i>Betula chinensis</i> Maxim.	1690-94-10
74.	<i>Betula jacquemontii</i> Spach	
75.	<i>Betula ovalifolia</i> Rupr.	0794-91-40
76.	<i>Betula oycoviensis</i> Besser	1507
77.	<i>Betula paishanensis</i> Nakai	0677-91-10
78.	<i>Betula papyrifera</i> Marshall	0346-92-10
79.	<i>Betula pubescens</i> Ehrh.	0607-92-10
80.	<i>Betula tatewakiana</i> M.Ohki & S.Watan.	1137-92-70
81.	<i>Betula x purpusii</i> Schneid.	356/80

Fast growing north american **Giant Sequoia - *Sequoiadendron giganteum***
(Nový Dvůr, Solnický, 1985)

**Seeds and fruits collected from plants cultivated outdoors
in the Nový Dvůr Arboretum**

BUXACEAE

82. <i>Buxus sempervirens</i> L.	'Aurea'	0875-94-80
83. <i>Buxus sempervirens</i> L.	'Fleur de Lys'	2127-95-80
84. <i>Buxus sempervirens</i> L.	'Hollandia'	2126-95-80
85. <i>Buxus sempervirens</i> L.	'Henry Shaw'	2141-95-80

CAPRIFOLIACEAE

86. <i>Kolkwitzia amabilis</i> Graebn.		3222-94-83
87. <i>Lonicera alpigena</i> L.		0673-93-10
88. <i>Lonicera alpigena</i> L.var. <i>glehnii</i> (Schmidt) Nakai		0476-94-10
89. <i>Lonicera x xylosteoides</i> Tausch		0966-93-70
90. <i>Lonicera xylosteum</i> L.		2287-92-10
91. <i>Sambucus racemosa</i> L.f. <i>aureocarpa</i> Hara		90525
92. <i>Symporicarpos oreophilus</i> A.Gray var. <i>utahensis</i> (Rydb.) A.Nelson		2108-96-10
93. <i>Symporicarpos oreophilus</i> Gray		1288-95-10
94. <i>Symporicarpos x chenaultii</i> Rehder		0388-95-80
95. <i>Viburnum betulifolium</i> Batalin		0716-94-10
96. <i>Viburnum burejaeticum</i> Regel		0302-05-70
97. <i>Viburnum lantana</i> L.		0169-92-10
98. <i>Viburnum lentago</i> L.		1995
99. <i>Viburnum opulus</i> L. var. <i>calvescens</i> (Rehder) Hara		1259-96-10

Group of Burning Bush in bloom – *Dictamnus albus* (Nový Dvůr, Solnický, 1963)

AGREEMENT ON THE SUPPLY OF LIVING PLANT MATERIAL¹ FOR NON-COMMERCIAL PURPOSES LEAVING THE INTERNATIONAL PLANT EXCHANGE NETWORK

Against the background of the provisions and decisions of the Convention on Biological Diversity of 1992 (CBD) and in particular those on access to genetic resources and benefit-sharing, the garden is dedicated to promoting the conservation, sustainable use, and research of biological diversity. The garden therefore expects its partners in acquiring, maintaining, and transferring plant material to always act in accordance with the CBD and the Convention on the International Trade in Endangered Species (CITES).

The responsibility for legal handling of the plant material passes on to the recipient upon receipt of the material. The requested plant material will be supplied to the recipient only on the following conditions:

1. Based on this agreement, the plant material is supplied only for non-commercial use such as scientific study and educational purposes as well as environmental protection. Should the recipient at a later date intend a commercial use or a transfer for commercial use, the country of origin's prior informed consent (PIC) must be obtained in writing before the material is used or transferred. The recipient is responsible for ensuring an equitable sharing of benefits.
2. On receiving the plant material, the recipient endeavours to document the received plant material, its origin (country of origin, first receiving garden, „donor“ of the plant material, year of collection) as well as the acquisition and transfer conditions in a comprehensible manner.
3. In the event that scientific publications are produced based on the supplied plant material, the recipient is obliged to indicate the origin of the material (the supplying garden and if known the country of origin) and to send these publications to the garden and to the country of origin without request.
4. On request, the garden will forward relevant information on the transfer of the plant material to the body charged with implementing the CBD².
5. The recipient may transfer the received plant material to third parties only under these terms and conditions and must document the transfer in a suitable manner (e.g. By using the documentation form, such as provided in Annex 1.3).

I accept the above conditions.

Date, signature

recipient's name and address, stamp

¹According to the CBD „genetic resources“ means genetic material of actual or potential value. This definition covers both living and not living material. The Code of Conduct and the [PEN] covers only the exchange of living plant material (living plants or parts of plants, diaspores) thus falling in the definition of genetic resources.

² ideally, the national focal point in the garden's home country

E-mail: arboretum@szm.cz Phone: +420553661031	E-mail: Phone:

In response to the International Convention of Biological Diversity (Rio de Janeiro, 1992), the Nový Dvůr Arboretum supplies the seed collections requested on the condition that:

1. They used for common good in the areas of research, trailing, breeding, education and the development of public botanic gardens.
2. If the recipient seeks to commercialise the genetic material, its products or research derived from it, then permission must be sought from the Nový Dvůr Arboretum. Such commercialization will be subject to a separate agreement.
3. The genetic material, its products or research derived from it are not passed to a third party for commercialization without written permission from the Nový Dvůr Arboretum.

I agree to comply with the conditions above.
